**To:** "TC" <[Terry@c-clearantifog.com](mailto:Terry@c-clearantifog.com)>

Terry,

The last time we spoke, I mentioned to you that I am also the Chairperson of the New Jersey Utilities Association Safety & Health Committee. Our group is comprised of the safety professionals for the following utilities in New Jersey:

**Atlantic City**  
**Electric Aqua New Jersey**  
**Elizabethtown Gas**  
**Gordon's Corner Water**  
**Middlesex Water**  
**New Jersey American Water**  
**New Jersey Natural Gas**  
**Orange & Rockland Electric**  
**Public Service Electric & Gas**  
**Shorelands Water South**  
**Jersey Gas**  
**United Water**  
**Verizon**

Our next committee meeting is on Friday, September 23rd. I would be glad to give out samples of your products and tell the members of the testing that we have done. Note - We tested your gel and spray against the following products:

**Bausch & Lomb Fog Shield XP Spray**  
**Bausch & Lomb Fog Shield 2-Step**  
**Wipes MSA Sightgard Wipes**  
**Fog Buster Spray**  
**Fog Buster 2 -Step Wipes**

Your gel was the best we tried and the spray was the 2nd best. It was reported to me that the gel lasted up to 3 days in the field without the workers safety glasses fogging up. The spray lasted a full day in the field. The best the other products did was up to 4 hours before the lenses fogged. I will be supplying this information to all of our locations within New Jersey as well as all of the other American Water locations around the country. So if you receive any orders with American in the company name (such as Pennsylvania American, California American, etc), it was from my recommendation.

If you send me some samples, I'll give them out at the September 23rd meeting. I already have the instructions, MSDS, and price list that you provided to me.

Bob Charney, CUSA
